THE;

PAN AFRICAN CONSERVATION EDUCATION:

We thank and appreciate for the services you render to the world. Even we thank you for the great research that you've carried out through the world especially in African countries, we really inform you that they explain and gives a clear description on how our environment is destroyed

once again we appreciate you for gathering wider information that will make our work more easily when educating our children and the community as well to conserve our resources.

We further appeal to you that we shall work hand to hand as far as conserving our environment is concerned.

Thanks

Yours faithfully.

Wambi Godfrey
